

NOW – Elson committed to being a leading manufacturer

Introducing Lead Free Press Brass Fittings and Valves

Our Commitment

Elson Australasia following a **public outcry** is now committed to being a leading manufacturer and supplier into Australia setting a higher quality benchmark by introducing lead free Press brass fittings and valves for both water and gas products.

Benefits to You: CLEAN HEALTHY DRINKING WATER

- Contribute to provide clean healthy drinking water in contact with lead free brass products.
- AS 4020 Materials in contact with drinking water compliance.
- Compliance to USA and European lead free brass guideline limits.
- Elson lead free brass products include: gas and water Press ball valves and fittings.

Caring for our ENVIRONMENT

- Elson lead free brass products offer an environmentally friendly advantage while still maintaining the proven product quality you expect from Elson Australasia. Our specially formulated lead-free brass alloy keeps the other properties you expect from brass the same.
- Lead free brass can be recycled maintaining the environmental benefits.
